- Camping (fee)
- Parking

Welcome to North Dakota!

To the eastern eye, used to hills and forests and people, North Dakota seems barren. But, look again, with a wider eye, to the distant horizon, the clear dome of blue sky, the prairie rolling away like a grassy ocean. Hidden in the folds of the land is one of the great waterfowl nesting areas of North America. Those rolling grasslands once supported buffalo by the millions, and you can see them in your mind's eye if you look hard enough. Montana calls itself "the big sky country"; the sky is no smaller in North Dakota. At night, it's filled with stars, and sometimes on the coldest nights you can almost hear the Northern Lights crackle as they dance in the sky. Home of friendly people and welcoming wide open spaces, the state has a special beauty all its own. The scattering of people across the rural parts of the state are a tough and hearty breed, few enough that the state is one of the last reserves of elbow room in an increasingly crowded country.

The McClusky Canal is a 73.6-mile-long canal designed to transport Missouri River water to the Sheyenne River, which flows into Lake Ashtabula reservoir above Valley City and, eventually, the Red River, and to the New Rockford Canal, another part of the GDU. The McClusky Canal crosses the continental divide between the Gulf of Mexico drainage basin and the Hudson Bay (Canada) drainage basin. The McClusky Canal has not been completed and currently does not connect to the Sheyenne River or the New Rockford Canal. From USGS, nd.water.usgs.gov
